Introduction to Genome Browsers

2/21/2013 12:00 PM, C2-003 Communicore

In this workshop we will learn how to navigate the genome browsers from [NCBI Genome Workbench](#), [UCSC Genome Browser](#), and [Ensembl](#). These browsers are valuable tools when identifying, localizing genes, and looking at their information in the genomic context. By using concrete examples, it will be shown how to locate a human gene, download a gene sequence and its upstream sequence, locate Single Nucleotide Polymorphisms (SNPs) and conserved regions, and use the browsers to download results in a batch.
