Important Information re: Postdoc Insurance:

If you have questions about benefits enrollment or eligibility, please contact UF's [Human Resource Services'](#) GA and Post Doc Associate Benefits Office at

hrrpostdocbenefits@admin.ufl.edu or (352) 392-0003.

Save the Date for the 2015 Postdoc Research Symposium: April 22

The 3rd annual Postdoc Research Symposium will take place on Wednesday, April 22 in Emerson Alumni Hall. Information about poster and oral presentations will be provided later, but please save the date if you anticipate participating.

More information about the 2014 Symposium is available here:
<http://postdoc.aa.ufl.edu/programs/postdoc-research-symposium/>

College of Medicine Celebration of Research: OPA Tabling

The [College of Medicine's Celebration of Research Poster Session and Reception](#) will take place on Monday, February 9 from 5:30-8:30pm in the Stephen C. O'Connell Center. The [Office of Postdoctoral Affairs \(OPA\)](#) will be tabling at the event. If you are at the event, please stop by and say hello! We will be there to answer any questions you might have about what the OPA can provide to enhance your postdoc experience while at UF. Hope to see you there!

Judges needed for the 3-Minute Thesis (3MT) Competition

The University of Florida Graduate School in collaboration with the Graduate Student Advisory Council (GSAC) is hosting its second annual Three Minute Thesis Competition. The competition challenges doctoral (Ph.D. or Ed.D) students to present their dissertation research to a non-technical audience in 3 minutes or less. Along with helping graduate students hone their communication and presentation skills, winners will be awarded cash prizes.

We are requesting volunteer judges! Preliminary heats will be held March 10th-18th and the final competition will be held April 7th. If you are interested in judging the competition please email Britney Sheffield [@bsheffield@aa.ufl.edu](mailto:bsheffield@aa.ufl.edu).

For more information, please visit <http://graduateschool.ufl.edu/student-life-and-support/3mt-competition>

Submitted by Britney Sheffield, Division of Graduate Student Affairs

NPA Annual Meeting

Dear Postdoctoral Fellows and Graduate Students,

We are excited to tell you about the upcoming National Postdoctoral Association Annual Meeting, part of our ongoing commitment to promote programs and resources that postdocs can use for success and to build a community. This year's annual meeting will be held from March 13-15th, hosted by The University of Maryland, in Baltimore. Our keynote speaker is Dr. Rosina Bierbaum, Professor of Natural Resources and Environmental Policy at the University of Michigan. Our entire Agenda at a Glance is available at the NPA website.

The deadline for early registration is February 13th, while the deadline for regular registration is February 27th, and is open to postdoctoral and graduate students and trainees, and others who might be interested. Becoming a member of the NPA allows you to register for the Annual Meeting at a reduced rate (full, paying members receive the greatest reduction): <https://npamembers.site->

ym.com/general/register_member_type.asp

Trainees from sustaining member institutions of the NPA can become Affiliate Members for FREE. However, becoming a full member of the National Postdoctoral Association is inexpensive, and comes with many benefits such as:

- Access to resources such as self-development tools and publications
- Discounts with corporate and publishing sponsors, including:
 - Zipcars
 - StuffBak
 - SciPhD
 - Wiley & Sons publications
 - Cold Spring Harbor Press
 - and more!
- Community, support, social network from peers/colleagues nationwide

A one-year membership for postdocs is \$35, while a two year membership is \$60. Faculty members and non-post docs may join at a one-year membership fee of \$75, while the two-year membership fee is \$140. Benefits start immediately for full members, perfect for those attending the annual meeting.

We also hope that trainees can benefit from the NPA's resources and get involved long before they transition into their postdoctoral training; therefore graduate students are welcome to join with a one year membership (\$35) or a two year membership (\$60)!

For additional information about membership, the annual meeting, and being a part of NPA, please visit our website at: <http://www.nationalpostdoc.org/>.

Submitted by the National Postdoctoral Association

Social Justice Conference seeks
Small Group Facilitators

Social Justice Conference seeks Small Group
Facilitators: March 14-15th

The Gator Global Initiative is a two day conference aimed at developing socially responsible leaders through panels and workshops. To further supplement the panels and workshops, we have created "Small Groups," which will allow participants to interact with their peers and build relationships. Participants will be able to reflect on their previous experiences and knowledge gained throughout the conference in these Small Groups, which are led by Small Group Facilitators. As a Small Group Facilitator you will be provided with an outline and questions to nurture reflection and discussion during each of the five Small Group Meetings over the course of the 2 days. Facilitators will be provided with training prior to the conference.

[Applications for Small Group Facilitators](#) will close on February 6, 2015.
Postdocs are encouraged to apply.

If you have any questions please contact Angela Garcia at

angelag@leadershipandservice.ufl.edu

Submitted by Josh Funderburke, Center for Leadership and Service

VITA Tax Services Available

VITA (Volunteer Income Tax Assistance) is the free income tax assistance for those making \$52,000 or less in 2013. Go to the IRS site

(<http://www.irs.gov/Individuals/Free-Tax-Return-Preparation-for-You-by-Volunteers>) search Gainesville to find a VITA site near you.

VITA will be offered from 5-9 p.m. Tuesday-Thursday starting the week of Jan. 26th and ending the week of April 13th (with no sessions during the week of the College of Law's spring break March 2-6). The Volunteer Income Tax Assistance (VITA) program utilizes the Student Organization room, located in Room 209 Bruton-Geer Hall. The doors to access Bruton-Geer near Law Admissions will remain open until 9 p.m. on those nights.

L'Oreal USA For Women In Science Fellowship- Applications Open February 2nd

The L'Oréal For Women in Science program recognizes and rewards the contributions women make in STEM fields and identifies exceptional women researchers committed to serving as role models for younger generations. More than 2,000 women scientists in over 100 countries have been recognized since the program began in 1998.

The L'Oréal USA For Women In Science fellowship program will award five post-doctoral women scientists in the United States this year with grants of up to \$60,000 each. Applicants are welcome from a variety of fields, including the life and physical/material sciences, technology (including computer science), engineering, and mathematics.

I invite you to collaborate with us and spread the word to your community about this special fellowship program for exceptional female post-doctoral researchers who are also committed to supporting women and girls in STEM.

Applications will open on February 2, 2015 and are due on March 20, 2015.

■ FAQ

The application and more information on the L'Oréal USA For Women in Science program can be found at www.lorealusa.com/forwomeninscience.

Should you have any questions or require additional information, please e-mail me at rpacifico@us.loreal.com.

Submitted by Rachel Pacifico, L'Oreal

Service-Learning in the Humanities: A Workshop for Interested Instructors and Community Partners

2 February 2015, Dauer Hall 215, 3:00-5:00 pm

Facilitated by Anita Anantharam (Center for Women's Studies and Gender Research) and Angela Garcia (Center for Leadership and Service)

What does Feminist Theory have to do with Slow Food? The answer to this

question is service-learning, a significant way for humanities scholars to connect theoretical ideas about the human condition to practical work in our communities. According to the National Service Learning Clearinghouse, service-learning is "a teaching and learning strategy that integrates meaningful community service with instruction and reflection to enrich the learning experience, teach civic responsibility, and strengthen communities." In other words, service-learning combines pedagogy and community involvement to bridge the gap between the academy and the community and bring service into the classroom where teachers can utilize resources in the community, students can gain valuable cultural and professional experience, and community organizations can benefit from increased awareness and volunteerism.

This hands-on workshop will introduce UF teachers and community partners to the growing field of service-learning with particular attention service-learning components and strategies for humanities courses. The first part of the workshop will discuss existing service-learning courses in the humanities at UF, illustrate relevant student learning objectives, and provide resources for developing mutually-beneficial and sustainable relationships with community partners involved in service-learning courses. The second part of the workshop gives participants time and assistance to develop service-learning components to their existing or future courses. There will be ample time for Q&A and interactive planning by all participants.

This workshop is open to all UF faculty, staff, and graduate instructors. UF participants are encouraged to invite current or potential community collaborators to join them in the workshop.

- Refreshments will be served.
- Please RSVP to the Center for the Humanities and the Public Sphere by January 29th: humanities-center@ufl.edu.
- Workshop participants are invited to bring a class syllabus or description of a class assignment. Short preparatory materials will be circulated in advance.
- This event is made possible with support from the Rothman Endowment at the Center for the Humanities and the Public Sphere, and the Center for Leadership and Service.

Anita Anantharam joined the University of Florida's Center for Women's Studies and Gender Research in 2006. Professor Anantharam received her Ph.D. in South and Southeast Asian Studies with a Designated Emphasis in Women, Gender, and Sexuality from the University of California, Berkeley. Her research interests are in the fields of nationalism and feminism in South Asia, women's movements, food and cultural studies. She has published two books: *Mahadevi Varma: Political Essays on Women, Culture, and Nation* (2010), and *Bodies that Remember: Women's Indigenous Knowledge and Cosmopolitanism in South Asia* (2012). She is currently working on a project on Domesticity and Food Politics--specifically, how women selectively participate in global politics through reinventing and reimagining the home as a space of resistance and revolution.

Angela Garcia earned her Bachelor of Arts in Sociology at University of Florida and her Master of Science in Nonprofit Management from Northeastern University. Serving as the Assistant Director in the Center for Leadership and Service she directly advises Florida Alternative Breaks and the many service trips it sends out each year. Angela has a passion for service, which is why she served two years as

an AmeriCorps VISTA, but has an even deeper passion for helping students find the benefits of being a socially responsible citizen.

Submitted by Tim Blanton, Center for the Humanities and the Public Sphere

Damon Runyon Cancer Research Foundation - fellowship opportunities - due 3/16/15

Our office wanted to be sure that you are aware of a funding opportunity from the [Damon Runyon Cancer Research Foundation](#). Please forward this note to anyone else who might be interested. If you or any of your colleagues choose to pursue an application, please let me know -- I would be happy to help with it.

Damon Runyon Postdoctoral Fellowship Award / Applications due on or before: March 16, 2015

The Foundation encourages all theoretical and experimental research relevant to the study of cancer and the search for cancer causes, mechanisms, therapies and prevention. **Candidates must apply for the fellowship under the guidance of a Sponsor—a scientist (tenured, tenure-track or equivalent position) capable of providing mentorship to the Fellow.** In addition to aiding in the planning, execution and supervision of the proposed research, the Sponsor's role is to foster the development of the Fellow's overall knowledge, technical and analytical skills, and capacity for scientific inquiry. The Sponsor is also expected to assist the Fellow in attaining his/her career goals. Awards are made to institutions for the support of the Fellow under direct supervision of the Sponsor. **Candidates who have already accepted a postdoctoral research fellowship award are not eligible.** The award is for up to \$320,000 over four years, no indirects.

Damon Runyon-Sohn Pediatric Fellowship Award / Applications due on or before: March 16, 2015

The Damon Runyon Cancer Research Foundation has joined together with the Sohn Conference Foundation, dedicated to curing pediatric cancers, to establish the Damon Runyon-Sohn Pediatric Cancer Fellowship Award. This award provides funding to basic scientists and clinicians who conduct research with the potential to significantly impact the prevention, diagnosis or treatment of one or more pediatric cancers.

Candidates must apply for the fellowship under the guidance of a Sponsor—a scientist (tenured, tenure-track or equivalent position) capable of providing mentorship to the Fellow. In addition to aiding in the planning, execution and supervision of the proposed research, the Sponsor's role is to foster the development of the Fellow's overall knowledge, technical and analytical skills, and capacity for scientific inquiry. The Sponsor is also expected to assist the Fellow in attaining his/her career goals. Awards are made to institutions for the support of the Fellow under direct supervision of the Sponsor. **Candidates who have already accepted a postdoctoral research fellowship award are not eligible.** The award is for up to \$320,000 over four years, no indirects.

For more information on either fellowship, visit:

http://www.damonrunyon.org/for_scientists

Please let me know if I or my colleagues can be of assistance.

PhRMA Foundation - funding opportunities for Clinical Pharmacology, Health Outcomes and Translational Medicine and Therapeutics Programs - due 2/1/15

***** Please note, deadline is very close. *****

Our office wanted to be sure that you are aware of a funding opportunity from the The PhRMA Foundation. Please forward this note to anyone else who might be interested. If you or any of your colleagues choose to pursue an application, please let me know -- I would be happy to help with it.

The PhRMA Foundation is now accepting applications for their programs in Clinical Pharmacology, Health Outcomes and Translational Medicine and Therapeutics. **The deadline date for these applications is February 1, 2015.** PhRMA foundation funds may not be used for indirect costs or fringe benefits.

CLINICAL PHARMACOLOGY

Faculty Development Award in Clinical Pharmacology: The purpose of this award is to encourage clinical pharmacology teaching, training, and research. Award recipients will receive two years of support at **\$120,000 per year**. Ideal candidates will have a minimum of four years total experience in a clinical pharmacology focused research program and residency training and a clear commitment to a career in clinical pharmacology.

HEALTH OUTCOMES RESEARCH

Health Outcomes research spans a broad spectrum of issues related to health-care delivery, from studies evaluating effectiveness of a pharmaceutical intervention, to the impact of reimbursement policies on outcomes of care. It also ranges from the development and use of tools to perform patient-based assessments to analyses of ways in which results of outcomes research are disseminated to providers or consumers to encourage behavior change.

Outcomes research incorporates a variety of methods from different disciplines. The application of outcomes research principles in evaluating the design, delivery, and effectiveness of pharmaceuticals includes but isn't limited to the following general areas:

Pharmacoeconomics

Pharmacoeconomics evaluates behavior of individuals, organizations, and markets concerning use of pharmaceutical products, services, and programs. The discipline frequently focuses on costs (inputs) and consequences (outcomes) of pharmaceutical use.

Patient Reported Outcomes

Patient Reported Outcomes focuses on the value assigned to duration of life as modified by the impairment of physical, social, and psychological functional states, perceptions, and opportunities influenced by disease, injury, treatment, or policy. In this context, the field is also known as health-related quality of life.

Other types of analyses and terminology under the umbrella of health outcomes are listed below:

- Burden of Disease
- Comparative Effectiveness Research
- Patient Preferences
- Patient Centered Outcomes Research
- Compliance/Adherence
- Cost-Consequences Analysis
- Cost-Benefit Analysis
- Cost-Effectiveness Analysis
- Cost-Utility Analysis
- Health Outcomes Research
- Health-Related Quality of Life
- Health Services Research
- Health Technology Assessment
- Patient Satisfaction

Pre-Doctoral Fellowships in Health Outcomes

This award provides \$25,000 in stipend support per year for one or two years.

Post-Doctoral Fellowships in Health Outcomes

- Applicants must have a firm commitment from a sponsor/mentor at an accredited U.S. university.
- Applicants must hold a Ph.D., Pharm.D., or M.D. degree.
- Applicants are encouraged to apply at the earliest point possible in their post-doctoral research
- The fellowship provides a stipend of \$55,000, paid quarterly, for a period of two years.

Sabbatical Fellowships in Health Outcomes

- Eligible applicants must 1) hold a Ph.D., Pharm.D., M.D. or Sc.D. degree in a field of study logically or functionally related to the proposed post-doctoral activities, 2) hold a faculty appointment that presents eligibility for sabbatical leave from their institution, 3) have institutional approval of a sabbatical plan that includes partial salary matching the PhRMA Foundation stipend, and 4) have an endorsement from a mentor who agrees to sponsor the applicant's visiting scientist activity.
- Eligible candidates will have approval for sabbatical leave from their institution

and a commitment from the research mentor who will host them at the visiting institution.

- The applicant and mentor of the program must describe how the multidisciplinary goals of the research experiential program will be accomplished, and provide assurance that key collaborating mentors endorse and are willing to support the plan.
- Matching funds must be provided by the institution.
- A stipend of \$40,000, payable quarterly for a minimum of six months and a maximum of one year, will be provided.

Research Starter Grants in Health Outcomes

- Schools of medicine, pharmacy, public health, nursing, and dentistry are eligible for this award.
- This program is not intended for individuals in post-doctoral training. However, those enrolled in post-doctoral training programs scheduled to conclude by July 1, 2015, who will hold an academic appointment by that time, may apply.
- Those holding academic rank of instructor or assistant professor, and investigators at the doctoral level with equivalent positions, are eligible to apply—provided the proposed research is neither directly nor indirectly subsidized to any significant degree by an extramural support mechanism.

Funding

- The grant provides funding of \$100,000 for one year.
- The grant is paid on a quarterly basis to the university on behalf of the applicant, with the understanding that the university will administer the funds.
- The funds have limited restrictions - a characteristic of the program.
- The funds may not be used for salary support of the grantee, but may be used to support technical assistance. The support of technical assistance may include the hourly wages of a technician; however the funds may not be used to provide fringe benefits or indirect costs for the technician.
- PhRMA Foundation funds may not be used for indirect costs or fringe benefits

TRANSLATIONAL MEDICINE AND THERAPEUTICS

“Translational medicine and therapeutics is a discipline focused on bridging experimental and computational technologies and discoveries in the research laboratory to their application in clinical practice. Examples of research components include activities in molecular and cellular biology, pathophysiology, systems biology, bioinformatics, modeling and simulation, and other quantitative sciences to connect basic biological concepts and entities to directly address unmet medical needs. The goals are to use clinical observation as the basis for hypothesis generation to further basic research and to efficiently advance the product of basic research to patients.”

The Translational Medicine and Therapeutics program aims to promote development and use of experimental and computational methods in an integrative approach toward clinical needs in diagnosis, treatment, and

prevention. This can involve enhanced understanding of human biological and disease processes, but requires a strong translational component. The program will support the concepts of translational medicine and therapeutics as defined by the Foundation and requires collaboration between basic and clinical research: Translational Medicine and Therapeutics awards will advance training and support career development of scientists engaged in research that significantly integrates innovative technologies with advanced biological, chemical, and pharmacological sciences and engineering methodologies in areas such as

- Genetics (Molecular, Pharmaco-, Population, Medical)
- Genomics (Functional, Structural, Toxic-, Pharmaco-, Comparative)
- Systems (Biology and Pharmacology)
- Pathways and Networks
- Integrative Biology
- Modeling and Simulation Target Identification and Validation
- Biomarker Discovery and Validation
- Vaccine Development
- Molecular Epidemiology
- Imaging
- Disease Modeling

Emphasis is placed on development of new experimental and computational approaches and technologies that facilitate translation of research into an elucidation and understanding of normal processes of human biology, as they function in disease, to directly support clinical needs.

Post-Doctoral Fellowships in Translational Medicine and Therapeutics

- Eligible candidates will have doctoral degrees, e.g., Ph.D., D.Sc., D.Eng., M.D., and seek to further develop and refine their skills and understanding of TMT through post doctoral training.
- Applicants must write and submit a research plan and provide the mentor's research record, as well as a description of how the mentoring experience will enhance the applicant's career development in TMT. A key component of TMT involves collaborative programs that span non-clinical and clinical domains, potentially involving multiple laboratories, advisers, and institutions.
- This award provides \$60,000 in stipend support per year for one or two years.

Research Starter Grants in Translational Medicine and Therapeutics

- Those holding the academic rank of Assistant Professor (or Research Assistant Professor) within a tenure track (or Research track) appointment, or Instructor, if eligible to apply for independent research funding by their institution, are eligible to apply for these research starter grants, providing their proposed research is neither directly nor indirectly already being subsidized to any significant degree by an extramural support mechanism. Individuals receiving only intramural funding or start-up funding from their institution are eligible to

apply for RSG awards

- Applicants will be judged on the scientific merits of the proposed research, and on the degree of need and fit within the scope and goals of the program.
- The program is not intended for those in postdoctoral training programs. However, individuals in postdoctoral training scheduled to conclude and who will hold an academic appointment by January 1, 2015, or the start of the grant period, may apply.
- The grant provides funding of \$100,000 for one year
- The funds may not be used for salary support of the grantee, but may be used to support technical assistance. The support of technical assistance may include the hourly wages of a technician; however the funds may not be used to provide fringe benefits or indirect costs for the technician

Postdoctoral Associate in molecular aspects of age-related macular degeneration position

The John P. Hussman Institute for Human Genomics at the University of Miami Miller School of Medicine is seeking a Postdoctoral Associate to work on the experimental aspects of age-related macular degeneration (AMD). This position will work on research directed towards identifying molecular mechanisms that confers the risk or protection of AMD.

Authors@UF: Ted Spiker February 3, 5:00 at Smathers Library

Authors @ UF: A Conversation with Ted Spiker

Associate Professor, Department of Journalism and Communications

Down Size:

Twelve Truths for Turning Pants-Splitting Frustration into Pants-Fitting Success

Date: Tuesday, February 3, 2015

Time: 5:00 - 6:15 p.m.

Location: Smathers Library (East), Room 100

Promotional Video

Sponsored by the Smathers Libraries Campus Conversations

Light refreshments provided

In addition to heading the department's magazine sequence and teaching many courses on magazine and feature writing, Professor Spiker is also a freelance writer who specializes in health and fitness writing. His work has been published in *Outside; O, the Oprah Magazine; Fortune; Men's Health; Women's Health; Esquire.com; Parenting; Prevention; Runner's World; AARP Magazine*; and many others.

Ted Spiker is also co-author of about a dozen books, including the bestselling *YOU: The Owner's Manual* series with Dr. Mehmet Oz and Dr. Michael Roizen. Before coming to UF, Spiker served in various editor positions in the magazine publishing world, including *Men's Health*, a 1.8 million circulation magazine.

Come meet Ted Spiker as he shares his vulnerable, hilarious and ultimately insightful experience on taking the scale—and himself—head on, and how he teaches, writes, runs and blogs while serving as the interim chair of the department. Check out his website at: <http://www.tedspiker.com/>.

See Ted Spiker, featured in the December 2014-January 2015 *Gainesville Magazine* issue, discussing "the lessons behind the laughter."
