School Science Fair Judges Needed

Alachua County Public Schools is seeking judges for the 2017 school level science fairs. If you understand the scientific method, are qualified to judge at least one category, and enjoy working with youth in a positive manner, please consider serving as judge!

All of the slots are filled on a first come, first served basis, so *register now* to reserve your space! As in years past, you may judge at multiple fairs, but may NOT judge your own child's (or mentee's) project. Undergraduate slots are limited in number, so if you fit this category, please don't delay in submitting your registration!

all science fair judges must complete online volunteer applications which will include an automatic background check of the national sexual predator website. The application process is simple and most people receive immediate feedback that their applications have been approved! Following you will find all the details you need to complete the application and register as judge.

Attached please find the following:

- Revised flyer listing calendar of fairs that still have openings and judging categories
- How To Complete An Online Volunteer Application For Science Fair Judges
- Science Fair Judge Registration

Easy Registration Steps:

1. Please take a look at the flyer to determine which fair(s) fit your schedule and which categories you'd like to judge.
2. Read How To Complete An Online Volunteer Application For Science Fair Judges.
3. Complete the online volunteer application at Bit.ly/ACPSapp, following the guidelines provided.
4. Once you've received your acceptance email from Raptor, please complete the Science Fair Judge Registration, indicating that you have an approved application on file.

5. Send the registration to Pam Fitzgerald at fitzgepp@gm.sbac.edu, and she will do her best to place you at the school(s) you have requested.

Please contact Pam Fitzgerald with any questions, 352-995-7250 x272 or fitzgepp@gm.sbac.edu.

'Be a Mentor not a Tormentor' Workshop

Thursday 14th December

12-2pm, 1031 Steinmetz Hall

Workshop leader: Dr Roger Fillingim, Distinguished Professor, UF College of Dentistry

Effective mentoring is critical to enable the next generation of scientists to continue advancing scientific discovery. However, most researchers receive no training in mentoring best practices. This interactive workshop will review characteristics of successful mentors and mentoring relationships and will discuss practices that enhance the quality of mentoring. Discussions of case scenarios will then be used to promote application of the principles outlined.

Center for the Humanities and Public Sphere Call for Proposals

The Center for the Humanities and the Public Sphere is pleased to announce its call for proposals for 2017-2018. These programs will be supported by the Robert and Margaret Rothman Endowment for the Humanities, the Humanities Fund, the Andrew W. Mellon Foundation and the Tedder Endowed Research Award in the Humanities. The Center encourages proposal submissions from faculty (and, in relevant instances, graduate students and staff) from disciplines across the humanities at the University of Florida.

Each announcement below includes one or two links with information outlining the application procedures. Any queries about these initiatives may be sent to the Humanities Center Interim Director Dr. Barbara Mennel. Completed proposals should be submitted through online submission.

More information can be found at <http://www.humanities.ufl.edu/proposals.html>.

Proposals:

Library Enhancement Program in the Humanities

Deadline: 5 January, 2018

Interdisciplinary Team-Teaching in the Humanities

Deadline: 5 January, 2018

Tedder Family Doctoral Fellowships and Rothman Doctoral Fellowships in the Humanities

Deadline: 12 January, 2018

Support for Workshops and Speaker Series in the Humanities

Deadline: 19 January, 2018

Rothman Faculty Summer Fellowships in the Humanities

Deadline: 16 February, 2018

Programs in the Public Humanities

Statement of Intent Deadline: 9 February, 2018

Final Proposal Deadline: 2 March, 2018

Publication Subvention

Rolling deadline

Intersections Research Into Teaching Grant

Deadline: 2 April, 2018

Submitted by Maggie Collins, Center for the Humanities and Public Sphere

Postdoc Mentoring Awards 2017-2018

The Office of Postdoctoral Affairs is pleased to announce the continuation of the Postdoctoral Mentoring Awards for outstanding mentors of UF postdocs. The mentoring awards were established to encourage and reward excellence, innovation, and effectiveness in mentoring UF postdocs.

Please apply using the [application for the 2017-2018 award](#).

Information about past award recipients is on the [Postdoc Mentoring Awards website](#).

If you wish to nominate an outstanding faculty member for the award, please email [Cheryl Gater](#) with the nominee's contact information.

The application deadline is *November 30, 2017*.

Postdoc Editors Association

The Office of Postdoctoral Affairs is pleased to announce the creation of the University of Florida's Postdoctoral Editors Association (UF-PEA), a service to help postdocs who seek to improve English grammar and writing style. The UF-PEA is comprised of postdoc volunteers from multiple colleges across the University who will offer preliminary review of manuscripts, grant applications, posters, slides and other scholarly presentations. While this service will be most useful to postdocs who speak English as a

second language, the service is free and open to all postdocs at UF. Our editors will provide feedback on structure and style of writing, but refrain from commenting on scholarship which is best honed by interactions between the postdoc and their mentor. UF-PEA will facilitate higher level postdoc-mentor interactions by reducing time spent on basic writing needs.

Postdoc Funding Opportunities

Multiple Postdoctoral Positions in Computational Biology and Bioinformatics

Position Description:

Post-doctoral fellow positions in computational biology focusing on gene expression. Cold Spring Harbor Laboratory invites applications for post-doctoral positions in the laboratory of Dr. Jesse Gillis and colleagues. The successful candidates will join a team at CSHL working to understand the molecular and functional basis of cellular properties, focusing on mammalian brains. This is a largescale project involving a number of complementary positions, ranging from bioinformatics, to neuroscience, to molecular genetics. While the focus of the position is computational, all projects involve substantial collaboration with wet-lab researchers generating unique data. This interdisciplinary work offers opportunities to address important questions in computational biology and neuroscience with first access to large novel data sets from single-cell RNA-seq. The expected duration of the position is approximately 3-5 years with renewal at the end of each year.

A major conceptual focus of the project will be developing new ways of assessing large-scale data for replicable signals. This position offers substantial scope for training for candidates interested in making a leap from computer science, neuroscience or genetics to data-focused research, particularly if it has arisen informally in their previous work.

In addition to a collaborative focus within the project itself, successful applicants will enjoy a wide range of educational opportunities at Cold Spring Harbor Laboratory. Cold Spring Harbor Laboratory is a world-renowned research and educational institution with programs in cancer, neuroscience, plant biology, genomics and bioinformatics. The Laboratory is recognized internationally for its excellence in research and educational activities.

Position Requirements:

This research sits at the intersection of three research areas: Computational analysis, genetics, and neuroscience. A strong candidate would have expertise in two out of the three areas and an interest in learning about the third. While a broad range of backgrounds are suitable for this position, a PhD in bioinformatics or computational biology is desirable.

A particular focus of our methodological research is replicability and meta-analysis and an interest in these areas is helpful. Experience with either Matlab or R is a plus.

Exceptional applicants without a formal computational background will also be considered, particularly if they are familiar with standard bioinformatics tools.

Please include a letter of interest outlining your research accomplishments and include the contact

information of three references. Applications can be sent directly to JGillis@cshl.edu.

Cold Spring Harbor Laboratory is an Equal Opportunity Employer.

Additionally, on the [Resources](#) page of the Office of Postdoctoral Affairs website, the Funding Opportunities page lists different funding opportunities available to postdocs.
